

RELAZIONE ERASMUS LISBONA

Prof. Salvatore Marciano

Both of the experiences have allowed me to grow from cultural and professional points of view. During the lessons in the class, we have learnt to speak basilar words in Portuguese and Spanish languages and well- understood ways of life, main landscapes and cultures such as food, streets, monuments and how to live there. During the visits, we had the opportunity to take part to a full immersion into the cities by knowing the most beautiful things to see, also thank to the guide of tutors who led us to know what and where we were tasting. They've be been some fantastic days, with the presence of companies made up of teachers of other schools from Campania, who made me soon feel part of a learning community so that I was never alone. I would like to prepare myself to new journey all around the Europe, because I couldn't ask better since also the structures where we stayed were as wonderful as places we visited. Moreover, I think Erasmus is the proper chance for teachers to improve their job and their person and to understand the main differences among different instruction'systems form which we should learn more.

I send you my certificates, attended at courses in Lisbon and Madrid.
